LEONARDO LIGHT

ASA DENTAL

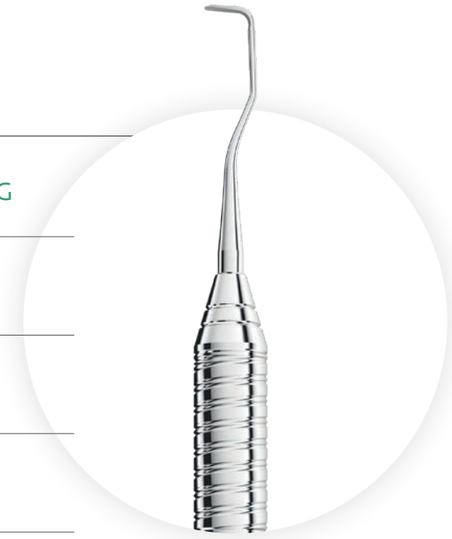

MAKE PEOPLE SMILE

WHEN SIZE MATTERS!

- IMPROVED CLEANING
- BETTER COMFORT
- EASIER HANDGRIP
- HELICOIDAL TRACKS
- INCREASED HANDLE (10 MM)
- ANATOMIC SHAPE

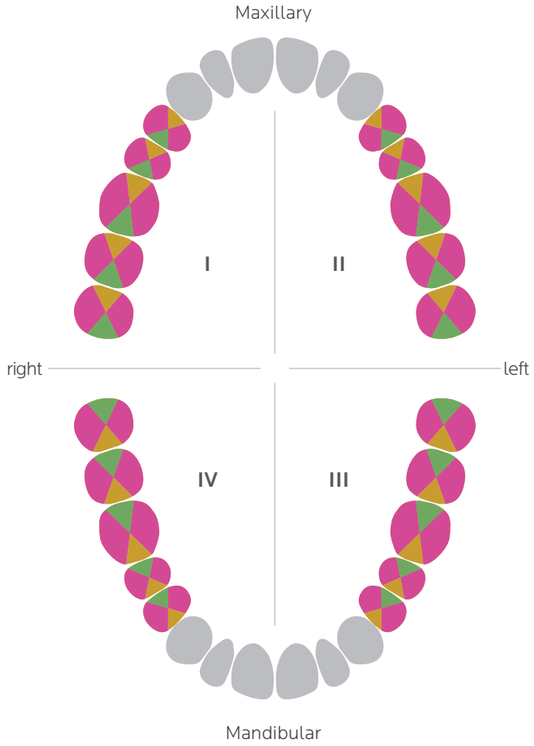

THE NEW HOLLOW HANDLE DESIGNED BY ASA DENTAL

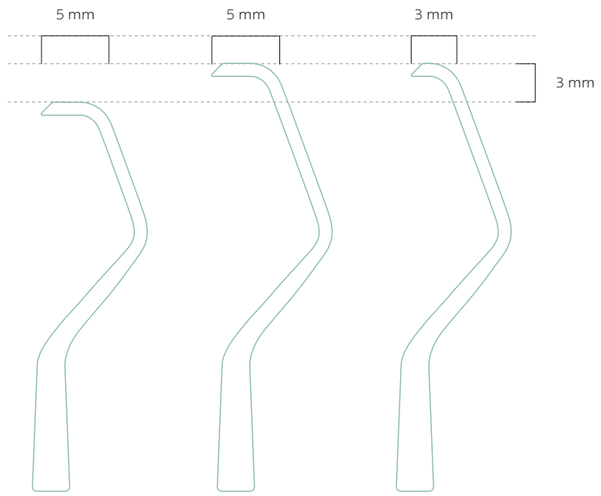

The new “LEONARDO LIGHT” design makes hollow handle instruments even easier to use. The first set of “LEONARDO LIGHT” instruments launched by Asa Dental is entirely focused on the hygiene segment, and particularly suited to address the needs of female professionals.

The new “LEONARDO LIGHT” handle has three main benefits: its 10 mm diameter allows better grip, the overall instrument weight is practically unchanged in order not to put strain on the hygienist’s working hand, and the new shape makes instruments more comfortable to use and easier to clean.

GRACEY USE CHART

- Anterior sextants of teeth
  - GRA 1/2 Incisors and Canines
  - GRA 3/4 Incisors and Canines
  - GRA 5/6 Anteriors and Premolars
- Buccal and lingual surfaces of posterior teeth

IMPROVED CLEANING

A new type of coating: **DLC Diamond-Like Carbon.**

DLC is known for its **high hardness**, ensuring greater wear resistance.

DLC has a **low coefficient of friction**, reducing residue adhesion and heat generation during instrument use.

Good **corrosion resistance**, protecting dental instruments from oxidation and wear caused by chemicals in the mouth.

DLC-coated dental instruments can be **easily sterilized** with standard methods, such as autoclaving, without compromising the coating properties.

Our DLC-coated instruments offer **extended durability, consistent precision**, and **enhanced safety**. This means longer-lasting tools that save you time and reduce costs, providing a tangible investment in your practice. You'll deliver **high-quality treatments** with optimal patient **comfort** and **safety**.
