MADE IN ITALY

PERFECTION®

ASA DENTAL

MAKE PEOPLE SMILE

PERFECTION

A new line of instruments designed and built for advanced treatments in the field of periodontal surgery, oral surgery and implant surgery. Handcrafted to ensure maximum construction quality of each instrument, Perfection is the new line for the most advanced dentistry.

PERFECTION WAS DEVELOPED IN COLLABORATION WITH TOP EXPERTS IN THE FIELD OF DENTISTRY AND IS THE SYNTHESIS BETWEEN LEADING-EDGE SCIENTIFIC KNOWLEDGE AND ASA DENTAL'S INDUSTRIAL TECHNOLOGY.

PERIODONTAL SURGERY KIT p. 12
ORAL SURGERY KIT p. 18
IMPLANT SURGERY KIT p. 23
SINUS-LIFT MAXI KIT p. 27
SINUS-LIFT MINI KIT p. 30

RESEARCH

SCIENTIFIC RESEARCH MEETS INDUSTRIAL TECHNOLOGY

The best dental instruments ever produced by Asa Dental, fruit of our solid collaborations with the most authoritative Italian universities and with the industry's top experts.

MATERIALS

THE BEST STAINLESS STEEL FOR MAXIMUM STABILITY

The most prized materials,
the most modern process techniques
and the stainless steel one-piece component
make these instruments true jewels
of stability and precision.

DESIGN

EFFICIENCY AT ITS BEST

Designed to be easy to handle and safe, the Perfection series of instruments embody the perfect balance between comfort and ease of use.

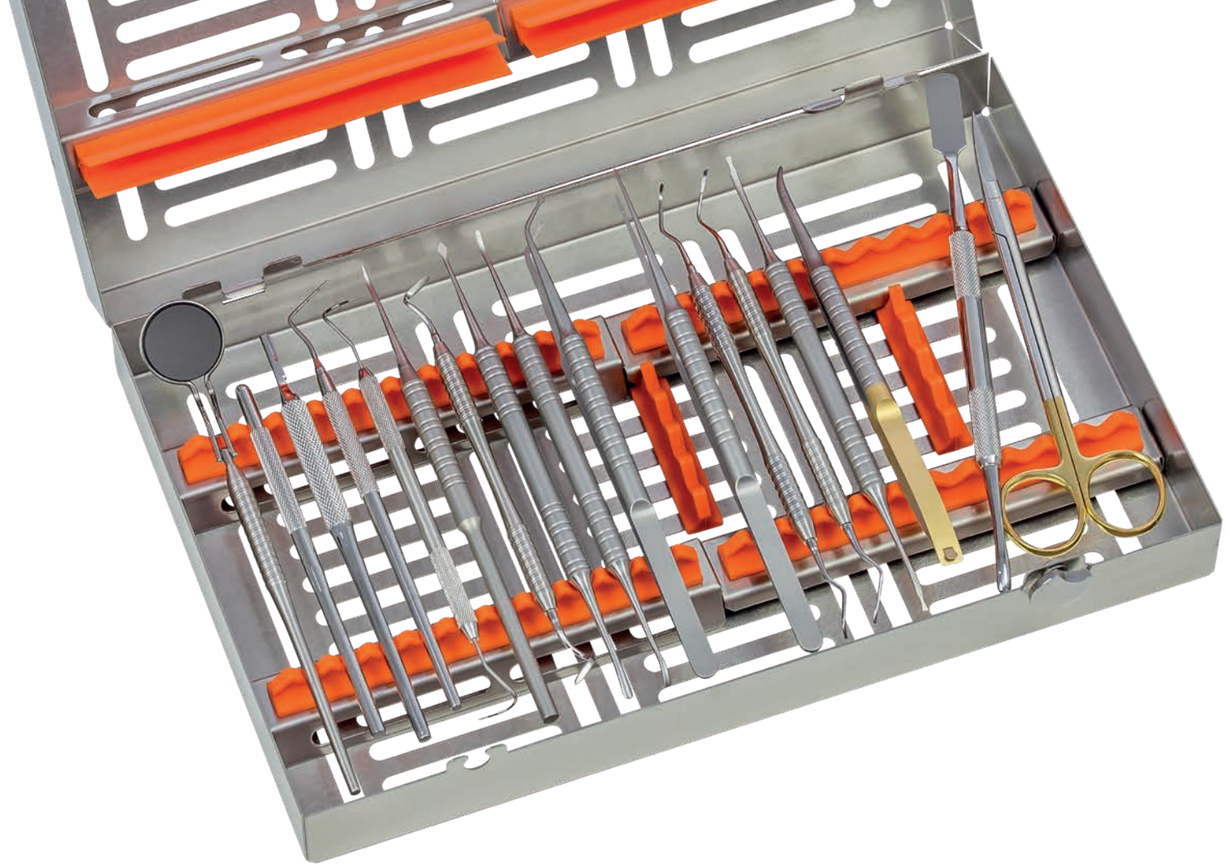

PERIODONTAL SURGERY
ORAL SURGERY
IMPLANT SURGERY

PERFECTION KITS

Three kits designed by top industry experts to give even the most demanding professionals the best answer for all advanced treatments in contemporary dentistry.

THE PERFECTION KITS ARE DEVELOPED TO GIVE THE MOST SPECIFIC AND MOST COMPLETE ANSWER FOR ORAL SURGERY, PERIODONTAL SURGERY AND IMPLANT SURGERY.

PERIODONTAL SURGERY KIT

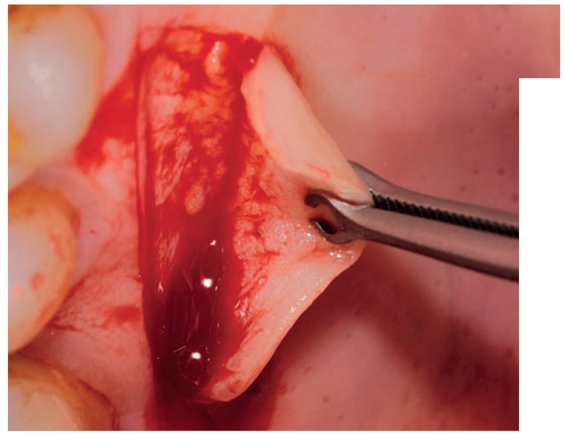

An ideal kit for periodontal surgery because it contains a broad range of instruments that allow handling practically all types of interventions in the realm of periodontal surgery.

AsaDental **Perfection**®
PERIODONTAL SURGERY KIT PR0625-3

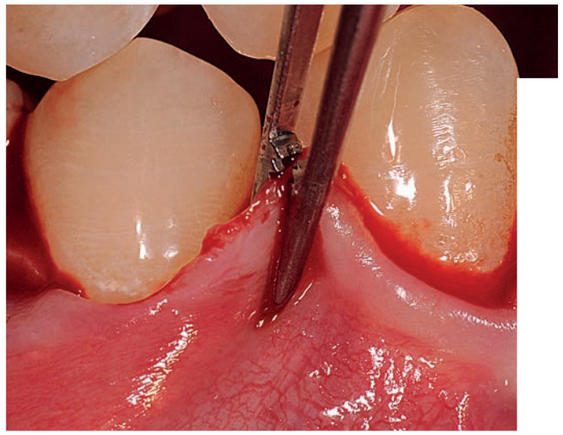

TISSUE PLIERS WITH THIN TIPS

Allow atraumatic manipulation of the soft tissue and facilitate suturing.

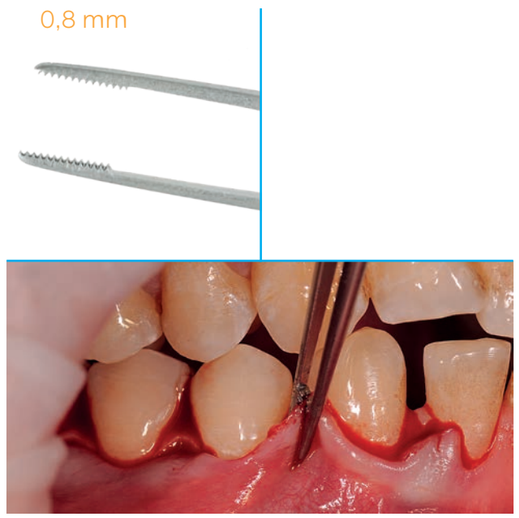

AsaDental **Perfection**®
PERIODONTAL SURGERY KIT PR0632-1

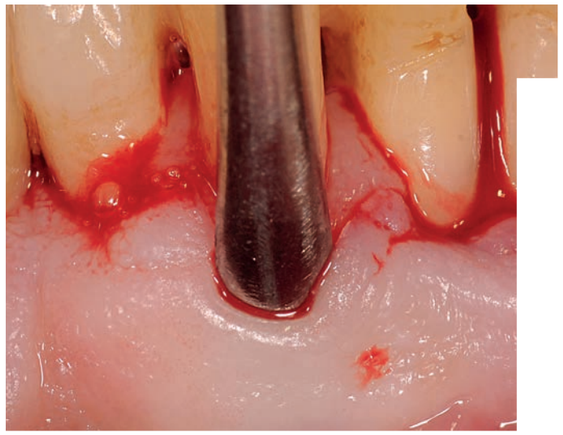

ATRAUMATIC TISSUE PLIERS WITH THIN TIPS

Allow maximum ease of handling in mobilizing the soft tissue and in suturing.

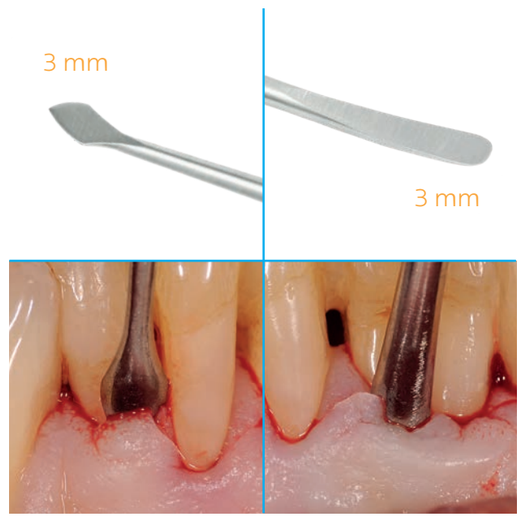

AsaDental **Perfection**®
PERIODONTAL SURGERY KIT PR1850-M

PERIOSTEAL ELEVATOR WITH ROUNDED TIP AND LANCE TIP

Allows efficient release of even the most restricted and scalloped gingival margins.

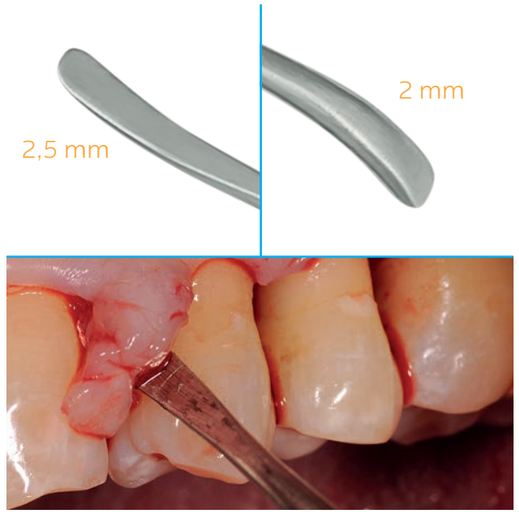

AsaDental **Perfection**®
PERIODONTAL SURGERY KIT PR1850-1

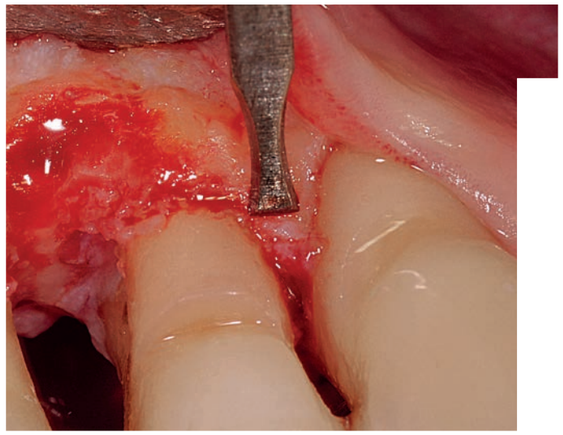

PAPILLA PERIOSTEAL

For atraumatic release and lifting
of the gingival papilla
in papilla restorative techniques.

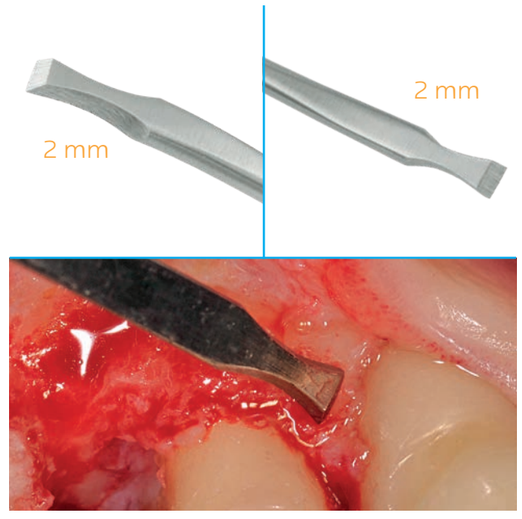

AsaDental **Perfection**®
PERIODONTAL SURGERY KIT PR1801-1

SMALL BONE CHISEL

Allows interproximal and
atraumatic bone remodeling
around the tooth root.

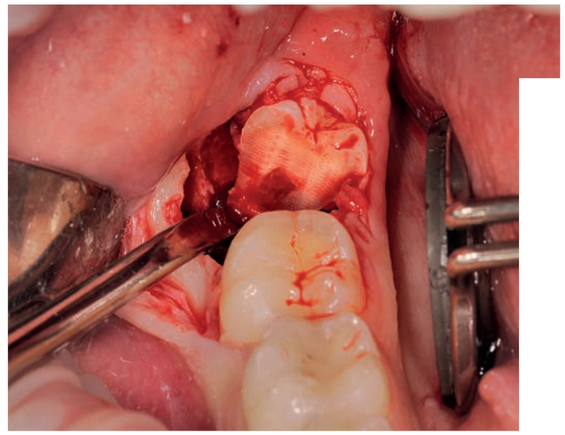

ORAL SURGERY KIT

A kit designed for simple and complex surgical extractions. Cases, for example, of dysodontiasis for which it is necessary to open a bone gap, cut a tooth (if needed) in order to be able to remove it safely and as less traumatically as possible.

FRIEDMAN ELEVATOR

Almost all impacted lower third molars can be handled with this Friedman elevator that, applied from above in the gap produced by bone resection, dislocates the tooth upward and backward.
Third molar cut and removal of fragment with the Friedman elevator (double mirror + Friedman).

AsaDental **Perfection**®
ORAL SURGERY KIT 0229-2F

FRIEDMAN ELEVATOR

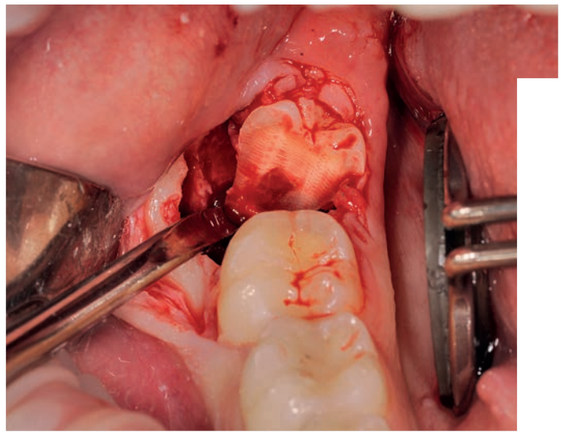

Almost all impacted lower third molars can be handled with this Friedman elevator that, applied from above in the gap produced by bone resection, dislocates the tooth upward and backward.
Third molar cut and removal of fragment with the Friedman elevator (double mirror + Friedman).

AsaDental **Perfection**®
ORAL SURGERY KIT 0291-1F

MINI FRIEDMAN ELEVATOR

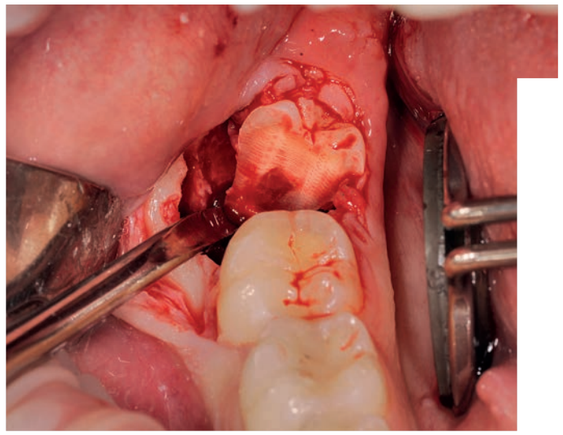

Almost all impacted lower third molars can be handled with this Friedman elevator that, applied from above in the gap produced by bone resection, dislocates the tooth upward and backward.
Extraction of third molar with Selding + Mini-Friedman + Prichard.

AsaDental **Perfection**®
ORAL SURGERY KIT 0291-2F

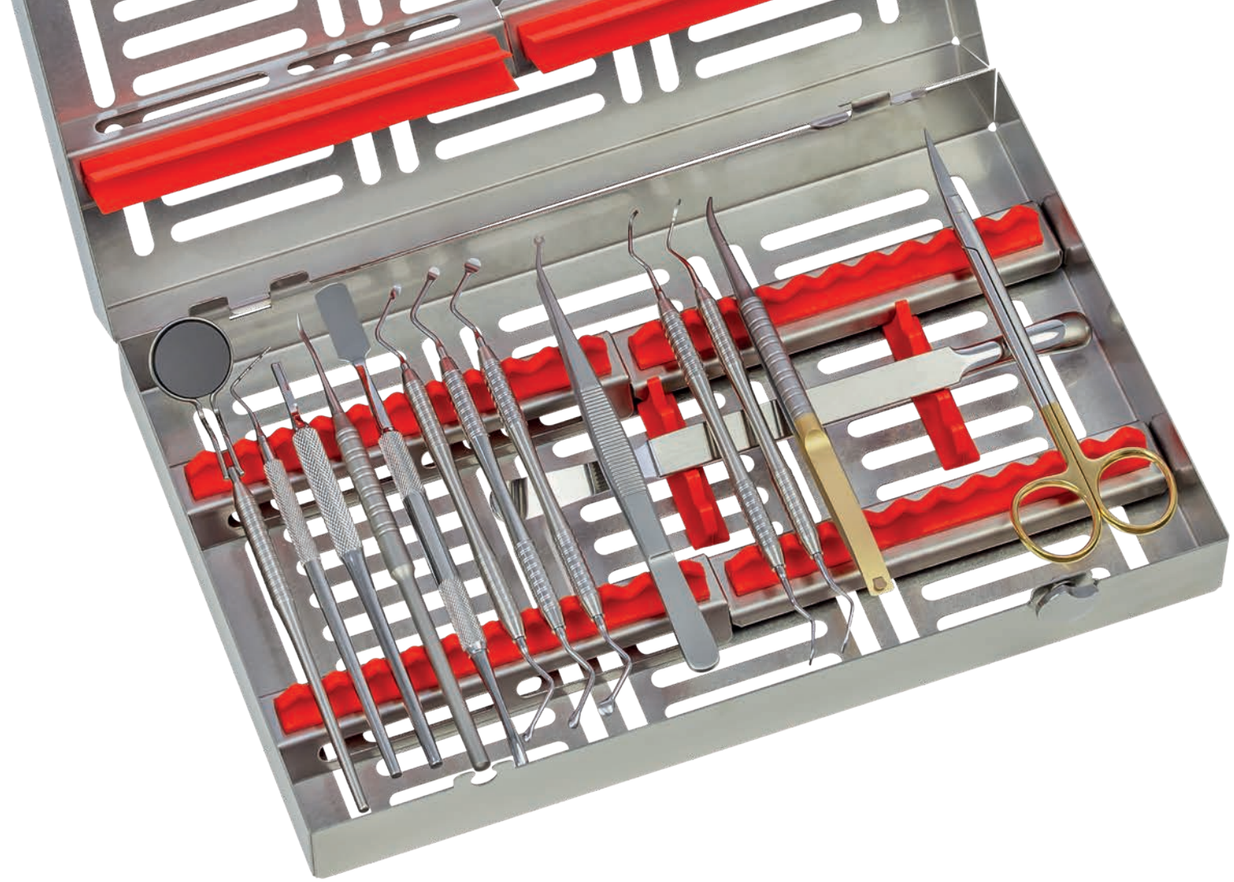

MINI FRIEDMAN ELEVATOR

Almost all impacted lower third molars can be handled with this Friedman elevator that, applied from above in the gap produced by bone resection, dislocates the tooth upward and backward.
Extraction of third molar with Selding + Mini-Friedman + Prichard.

IMPLANT SURGERY KIT

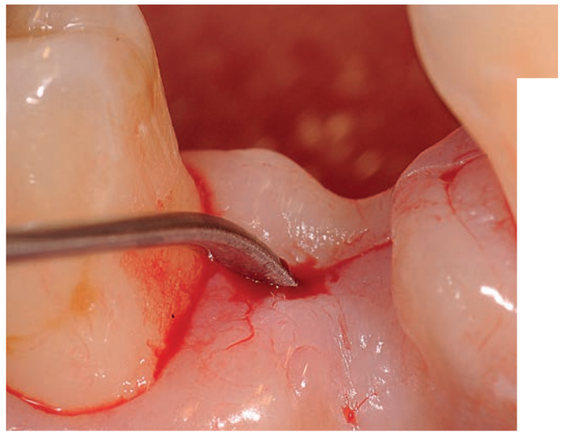

An instrument kit for basic implant surgery to be flanked with other specific and sophisticated instrument kits as required, such as the Sinus-Lift Mini Kit and the Sinus-Lift Maxi Kit.

IMPLANT SURGERY KIT PR1857-1

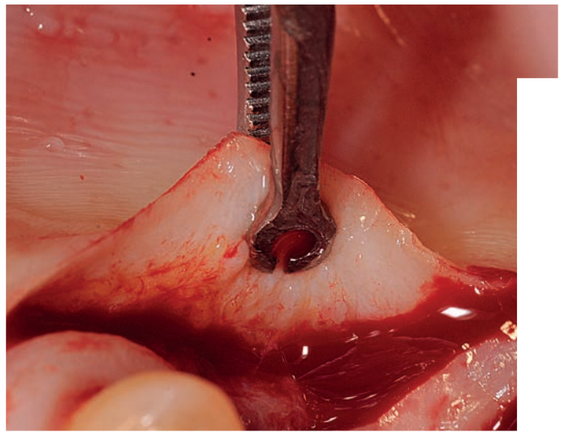

EXCISER

Used immediately following scalpel incision, it facilitates surgical incision and net release of the periosteal in bone exposure.

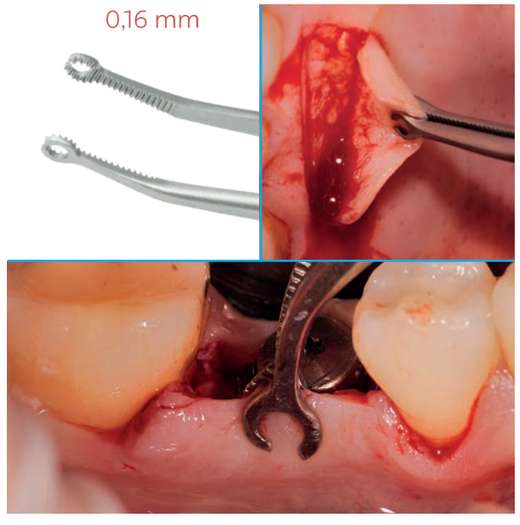

AsaDental **Perfection**®
IMPLANT SURGERY KIT PR0625-2

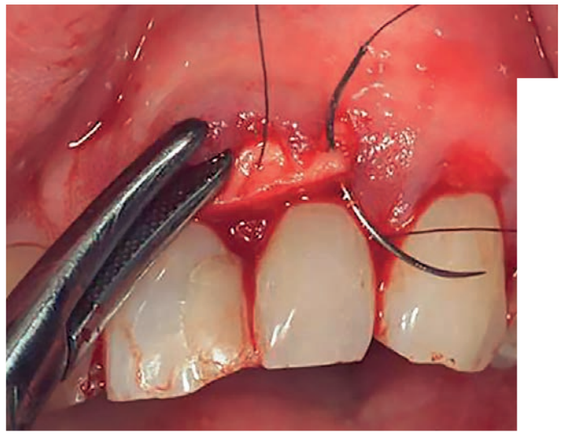

TISSUE PLIERS - SUTURE PLIERS

Allows atraumatic manipulation of the soft tissue and facilitates suturing.

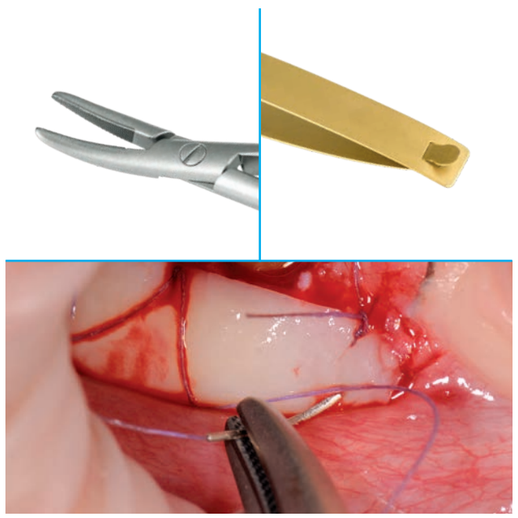

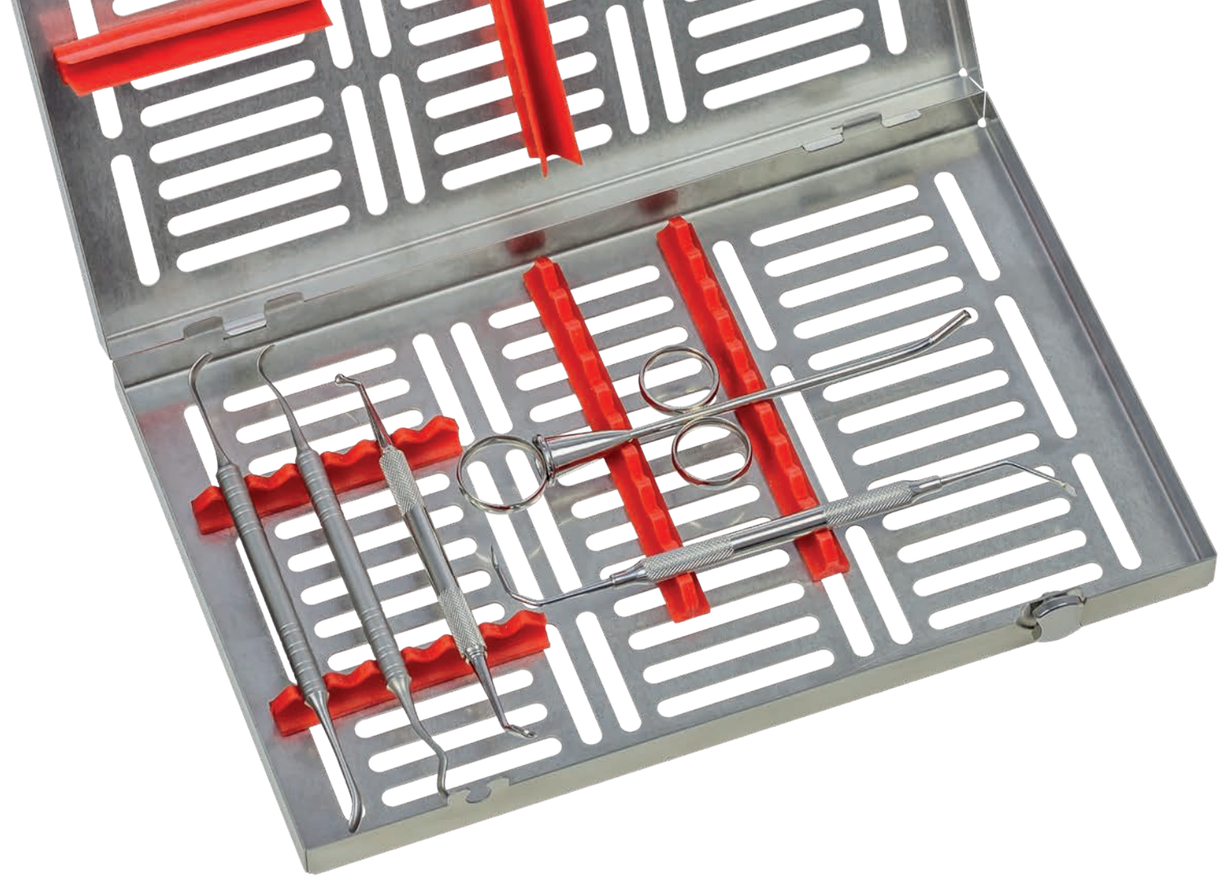

AsaDental **Perfection**®
IMPLANT SURGERY KIT PR0460-15TC

CURVED CASTROVIEJO NEEDLE HOLDER

Allows maximum ease of handling during suturing.

SINUS-LIFT MAXI KIT

SPECIFIC INSTRUMENTS TO BROADEN THE IMPLANT SURGERY KIT

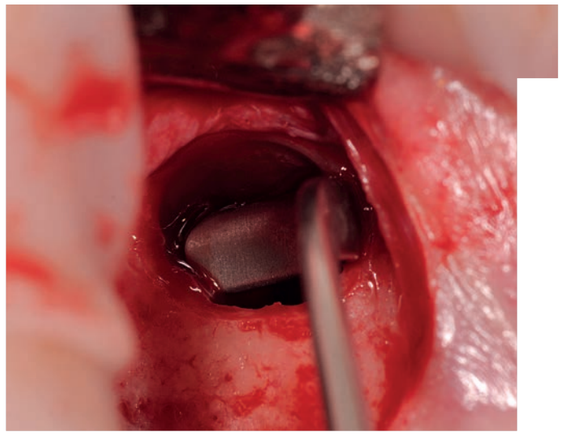

The maxillary sinus lift is a surgical technique aimed at increasing the amount of bone available in the posterior sectors of the upper maxillary.
In this area, the pneumatization of Higmoro's antrum on one side and the edentulous alveolar process resorption on the other compete to make implant anchorage prosthetic rehabilitation impossible.

PR1859-2	MV1856-2
MV1231-1	2770-3R

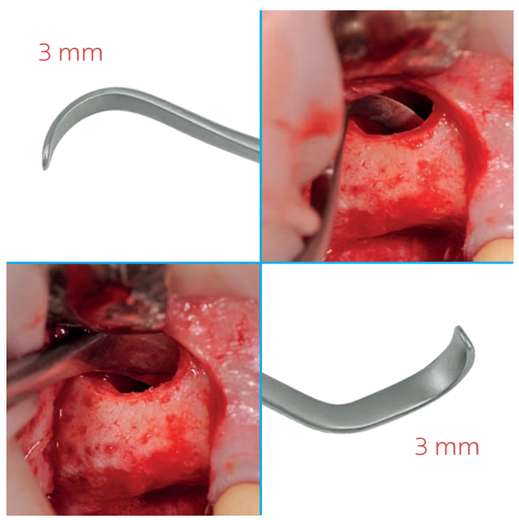

AsaDental **Perfection**®
SINUS-LIFT MAXI KIT PR1859-1

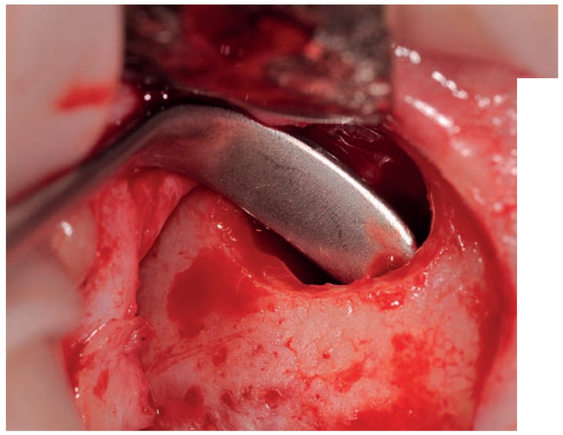

SINUS LIFT

Specific choice of sinus lift that for size, shape and angle, allows optimal access in order to gently separate the Schneiderian membrane and elevate it. The smaller size of the operational portion allows separating the membrane also in micro bone windows.

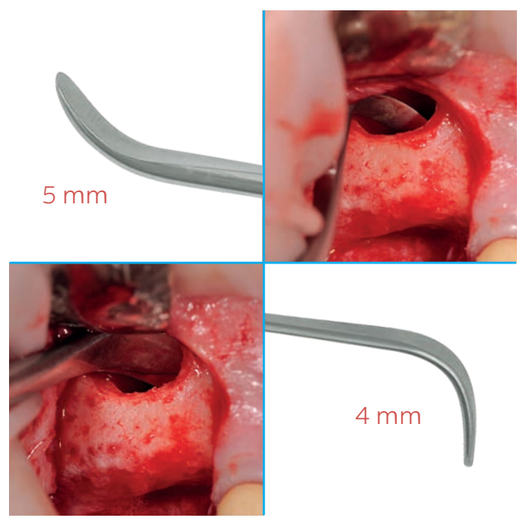

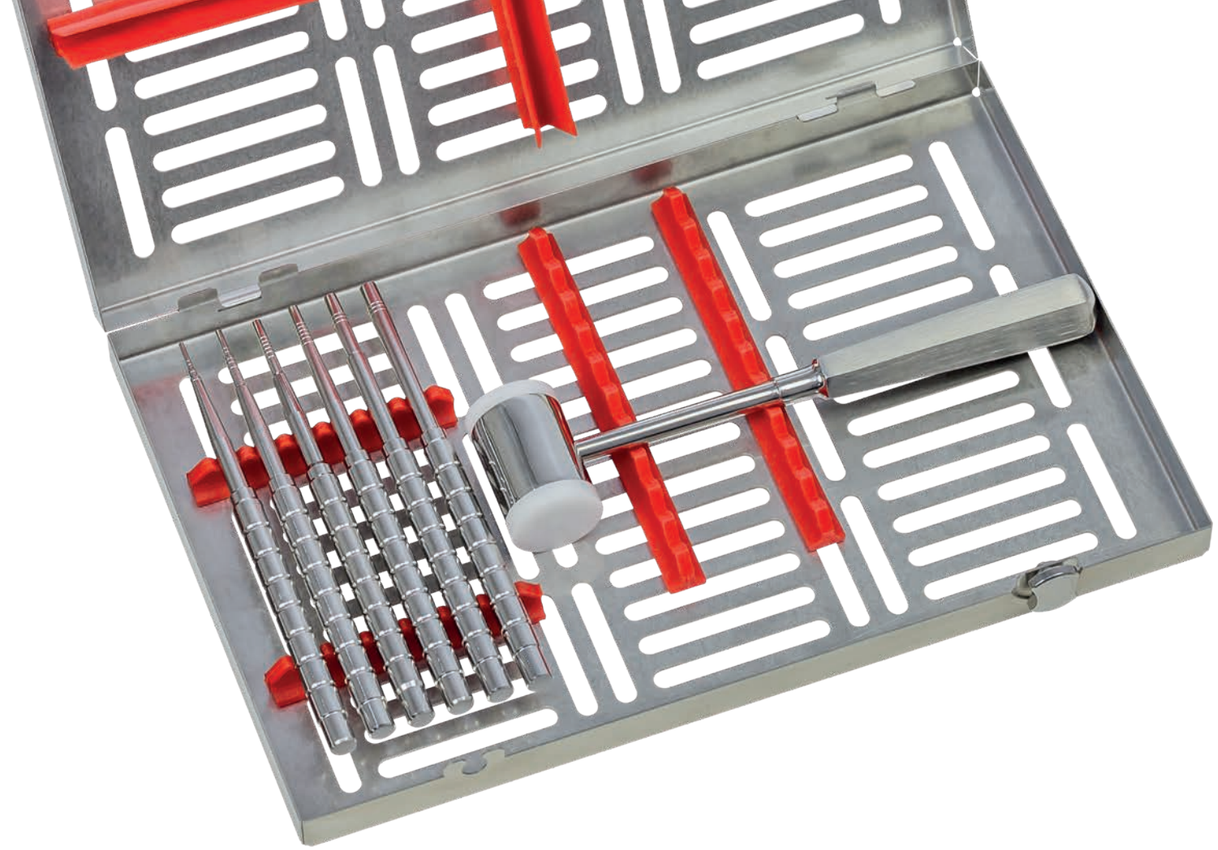

AsaDental **Perfection**®
SINUS-LIFT MAXI KIT PR1859-2

SINUS LIFT

The instrument allows obtaining a sufficient lateral sinus lift, guaranteeing placement of appropriately sized implants in situations of lack or absence of residual bone.

SINUS-LIFT MINI KIT

SPECIFIC INSTRUMENTS TO BROADEN
THE IMPLANT SURGERY KIT

Osteotomes can be used to lift
the maxillary sinus via a crestal approach.
Use of osteotomes and percussion
with a mallet indirectly dislocates
the sinus membrane, gaining those
millimeters of height necessary
to place an appropriately sized implant.
